

[D3m.] Find zoning term definitions

v. February 23, 2021

There are three locations where a description of what can be built in each zone, can be found:

a) The Planning Division has a “quick reference guide” which provides a brief description for each zoning designation along with several examples of uses. [link]

b) A more detailed document was prepared by a “cut and paste” method by taking the descriptions of each zoning type from the BDC title 2 and placed them all in one document. [link]

c) Here is a link to a resource titled “Navigate Bend Development Code.” This resource describes how to navigate the Bend Development Code which is where the definitions originate from. This resource gives an overview of the BDC and should be a must read for any Land Use Chair.
